

CASSONETTO RESTAURO

1 - Il sistema cassonetto in PVC restauro, prodotto e commercializzato da **Area Serramenti**, si caratterizza per le eccellenti proprietà di isolamento termico e acustico, l'eleganza e la modularità della soluzione.

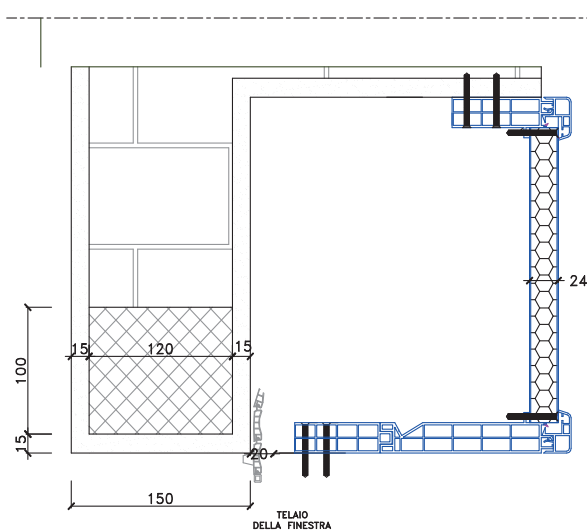

2 - Il profilo è strutturato in due camere e presenta una guarnizione co-estrusa per una maggiore tenuta e qualità. Il cassonetto è proposto in due varianti costruttive, determinate dalla presenza o dall'assenza dell'elemento isolante in polistirene espanso. Grazie alla semplice struttura a due profili, eccelle in versatilità e possibilità d'impiego: l'esecuzione può essere personalizzata a seconda delle necessità, in funzione delle diverse profondità ed esigenze di installazione.

	Schüco Cassonetto restauro	Schüco Cassonetto restauro ridotto
Dimensioni		
Profondità del profilo principale	135 mm	55 mm
Possibile spessore del pannello	24 mm	24 mm
Possibile spessore isolante interno	8 mm – 20 mm	8 mm – 20 mm
Test		
Trasmittanza termica a norma EN ISO 10077-2:2017 (massimo) *	U _{sb} = 0,98 W/(m²K)	U _{sb} = 0,98 W/(m²K)
Isolamento acustico a norme UNI EN ISO 10140-2:2010 e UNI EN ISO 717-1:2013 (massimo) *	R _w = 40 dB	R _w = 40 dB
Resistenza al vento calcolata secondo la scala Beaufort	2000 Pa	2000 Pa

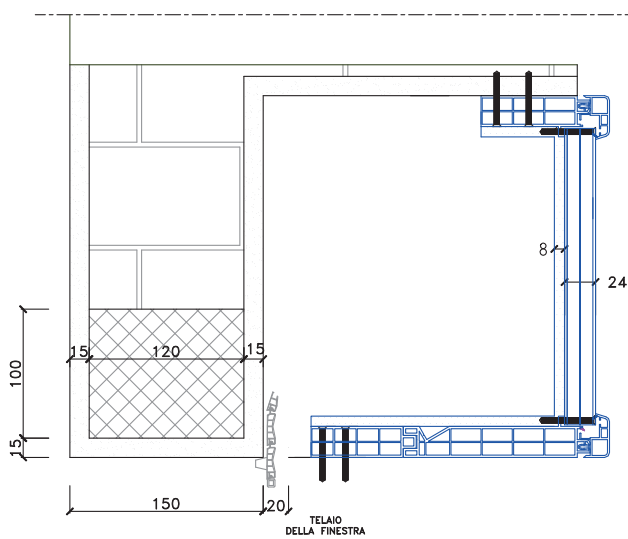

* A seconda del pannello e del materiale isolante.

CASSONETTO STANDARD

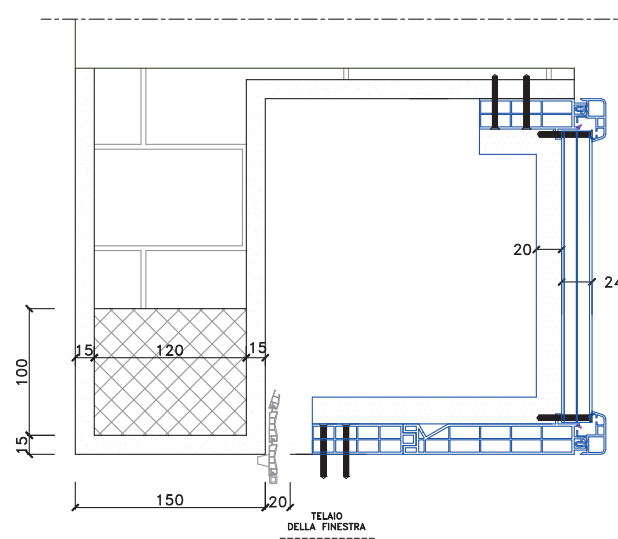

Versione standard da 24 mm.

CASSONETTO CON ISOLANTE

Versione da 24 mm. con isolante termico da 8 mm

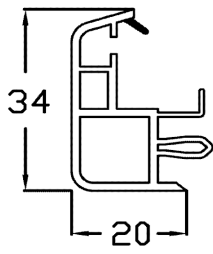

Versione da 24 mm. con isolante termico da 20 mm

Risultati della prova sui cassonetti con isolante termico

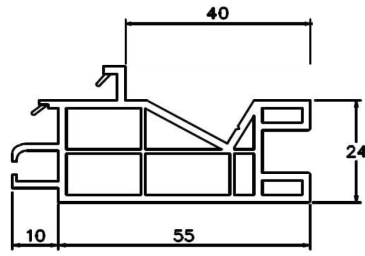

Il valore di trasmittanza termica del cassetto calcolato secondo la norma EN ISO 10077-2 risulta:

Denominazione del cassetto	Altezza del cassetto "b _{sb} " [mm]	Trasmittanza termica "U _{sb} " [W/(m ² · K)]
Cassonetto Schüco PVC con doga da 24 mm e isolante da 8 mm	281	1,3
Cassonetto Schüco PVC con doga da 24 mm e isolante da 20 mm	281	0,98
